The MX-1810U is an ideal choice for any small office or workgroup. It includes all the major functions that every office needs - plus robust security - and you can add options to choose your ideal configuration. So you get everything you need in one of the smallest, most space-saving MFPs in its class, with special emphasis on ease of use. The MX-1810U has a 7-inch colour touch screen control panel with thumbnail previews and a convenient stylus pen for easy operation. There are even 'easy grip' handles on the paper drawers. It's easy to manage, too, thanks to a Remote Access Control facility for operating, configuring and troubleshooting the MFP across the office network. Choose from a range of options to create a custom configuration that's exactly right for you. A Reversing Single Pass Feeder makes double-sided scanning and copying quick and easy. The optional internal hard drive lets you store and reuse documents. And you can also specify a useful fax capability and access to third party software with Sharp OSA for automating routine office tasks. The Energy Star-certified MX-1810U uses Sharp's green technology to support your environmental objectives. A fast warm up time, an efficient LED scanner, self-adjusting and pre-set auto shut down capabilities, and other smart design features give this MFP one of the lowest typical electrical consumption figures in its class.
